

At Infosys Imagic, we offer a wide range of software solutions designed to enhance efficiency, accuracy, and productivity across industries. Our software products are tailored to meet the specific needs of various sectors, including manufacturing, logistics, agriculture, and construction.

Our Software Solutions

1. Weighbridge Interface for SAP

Seamless integration with SAP systems for real-time data exchange and improved process automation.

2. Weighbridge Interface for ERP

Efficient connectivity with ERP platforms for streamlined operations and enhanced reporting capabilities.

3. Industrial Weighment Software

Reliable and customizable software for managing industrial weighing processes, ensuring precision and compliance.

4. Weight Automation Software

Automated solutions to manage and record weighing operations, reducing manual intervention and errors.

5. Payroll Software

Comprehensive payroll management system for accurate salary processing, tax calculations, and employee records management.

6. Automation Software

Custom automation solutions to optimize workflows and enhance productivity across operations.

7. Weighing Balance Software

Software for accurate weighing balance readings and data integration into central systems.

8. Platform Scale Weighbridge Software for SAP

Specialized software to link platform scales with SAP, ensuring real-time data capture and reporting.

9. Crusher Software

Software designed to manage the weighing, tracking, and inventory processes in crusher plants.

10. Scale Software

Versatile software compatible with different types of weighing scales for improved monitoring and reporting.

11. Weighing Scale Software

Accurate data capture and reporting software for standalone or networked weighing scales.

12. Truck Scale Software

Software for managing weighbridge operations for trucks, including weight records, reporting, and integration with ERP.

13. Weighment Software

Comprehensive weighment tracking and reporting software for all types of weighing processes.

14. Weighbridge Software

Dedicated software for weighbridge management, including ticketing, reporting, and system integration.

15. Bag Cement and Weighing System

Specialized software for bagged cement production and weighing, ensuring accuracy and compliance.

16. Construction Management Software

Complete software solution to manage construction materials, weighing processes, and project tracking.

17. Mining Software

Tailored software for the mining industry, offering comprehensive weighment and inventory tracking.

18. Imagic Bulk Loading System

Advanced system for managing bulk material loading processes with accuracy and efficiency.

19. Unmanned Weighbridge Software

Automated, unmanned weighbridge management system for improved efficiency and reduced operational costs.

20. Crop Collection Mobile App

Mobile application for tracking crop collection at source, including weight capture and data synchronization.

21. Mobile Farmer/Collection Center Android App

User-friendly Android application for farmer data collection, crop weighment, and real-time reporting.

22. Automated Belt Scales and Bulk Loading Conveyor

Software solution for managing automated belt scales and bulk loading conveyor systems, ensuring seamless data capture.

23. Distribution Sales and Marketing (DSM) App

Comprehensive app for managing sales and marketing operations, including order management, customer tracking, and performance analysis.
